Sprint 1 – Week 6 Recap

ASE 485 – Capstone Project

Jeff Perdue

Week 6 Focus: Item Discovery & Menu Editing

Goal

Improve how business users **find and manage** menu items and menus.

Context

- Builds on Week 5 front-end refactor
- PPP Feature 3 – **Expanded Search, Filter, and Sort**
- New UI/UX for editing menus and menu items

Enhanced Search, Sort, and Filter

What Was Added

- **Search** menu items by name
- **Filter** by menu or by allergen (items that contain or do not contain selected allergens)
- **Sort** options for item lists
- Search, filter, and sort work **together** so users can refine results without losing their choices

Why It Matters

- Faster item lookup

- Less friction when reviewing or updating allergen-related data

- Predictable, controllable discovery

New UI/UX for Editing Menus and Menu Items

What Changed

- Clearer flows for **editing menus** and **menu items**
- Easier to see what you're editing and where you are in the flow
- More consistent layout and controls

Outcome

- Better control over menu and item data
- Fewer errors and less confusion during updates

Outcomes vs Sprint 1 Plan

Week 6 Deliverables

- Feature 3 – **Expanded Search, Filter, and Sort** completed

- Item discovery improved (search, filter, sort in place)

- Menu and menu-item editing experience updated for clarity and ease of use

This completes the Week 6 milestone and sets up **Week 7: Improved Business Onboarding**.

Sprint 1 Completion Metrics

- Features completed so far (Jeff, Sprint 1 Week 6): **3 / 4**

- Completed: Feature 1 – Archive Non-MVP Features

- Completed: Feature 2 – Refactor MVP Features (Front-End)

- Completed: Feature 3 – Expanded Search, Filter, and Sort

- Actor–goal requirements completed so far: **16 / 22**

- Completed this sprint: R3.1–R3.6 (added to R1.1–R1.5, R2.1–R2.5)

- Burndown rate: **~73%**

Looking Ahead

Next in Sprint 1 (From PPP)

- **Week 7:** Improved Business Onboarding
  - Structured onboarding flow
  - Clear required fields and validation
  - Optional prefilled data from external services

The Week 6 work gives business users **stronger discovery and editing** so they can manage menu and allergen data more efficiently.
